

Sprint 3 Report
PoliTrack
PoliDev
11/17/18

Actions to stop doing - Focus on everyone's own respective tasks first, then help other team members

Actions to start doing - Make sure that everything is updated and inform the team when tasks are done or have issues

Actions to keep doing - Still very good at communication and everyone is very understanding and supporting of each other's schedules

Work completed/not completed - We're almost finished with the tasks in progress, but we couldn't finish 5 of the tasks because we estimated slightly off.

Work completion rate

- # of story complete = 3/4 completed for the 1st user story, 2/3 completed for the 2nd, 2/3 completed for the 3rd, and 1/3 completed for the 4th according to the Trello board above.
- Estimated ideal work hours completed for Sprint 3 = 18/25, because our estimation time was off for a few of the tasks.
- Number of days for Sprint 3 = 14 days
- Average daily ideal work hours = $75 \text{ total hours} / (12 + 10 + 14 \text{ days}) = 2.083 \text{ hours per day}$
- Average daily user stories done = $2.5 (\text{Sprint 1}) + 2.42 (\text{Sprint 2}) + 2.083 (\text{Sprint 3}) / (36 \text{ days}) = 0.1945 \text{ user stories per day}$
