

Sprint 2 Report  
PoliTrack  
PoliDev  
11/2/18

Actions to stop doing - Team should be more active and continuously check on the project on a daily basis

Actions to start doing - Should start taking the initiative and get ahead of schedule if we complete everything planned.

Actions to keep doing - Definitely a lot of creativity and ideas to add to the app, communication has been pretty good as well

Work completed/not completed - Everything has been completed except the two tasks in progress shown below on the chart

### Work completion rate

- # of story complete =  $\frac{3}{4}$  completed for the 1st user story,  $\frac{2}{3}$  completed for the 2nd, and  $\frac{3}{3}$  completed for the 3rd according to the Trello board above.
- Estimated ideal work hours completed for Sprint 2 = 20/25, because the last two tasks were harder than we thought it would be.

- Number of days for Sprint 2 = 10 days
- Average daily ideal work hours =  $50 \text{ total hours} / (12 + 10 \text{ days}) = 2.27 \text{ hours per day}$
- Average daily user stories done =  $2.5 \text{ (Sprint 1)} + 2.42 \text{ (Sprint 2)} / (22 \text{ days}) = 0.22 \text{ user stories per day}$
