

Sprint 1 Report
PoliTrack
PoliDev
10/20/18

Actions to stop doing - Team should stop waiting for assigned work, be more active.

Actions to start doing - We should start getting use to a more stable scrum schedule. We should also start some pair programming work to help members with less Android experience.

Actions to keep doing - Lots of creative ideas around the project and improvements to features.

Work completed/not completed - The in progress tasks are not completed

Work completion rate

- # of story completed = 1/1 completed for 1st user story, 1/2 completed for 2nd, 1/1 completed for 3rd, 1/2 completed for 4th, according to the scrum board above.
- Idea work hour completed = 20/25, because we didn't implement pulling data yet. Only the members that are experienced worked on the project, others still learning but helped on documents. Thus, harder to reach development goal.
- Total number of days = 12 days
